EXPERIENCE

GREENFOX ACADEMY   (2019-07 – 2019-12)

During the course my main language was **Java** and used **Spring framework** for building **web applications,** following the **MVC** design pattern. Later I switched to **C#** for the more advanced topics. For a real like project I was working with C# in **ASP.NET Core** environment for the last two months of the bootcamp.

UNIT LEADER   (2018-02 – 2019-07)

My responsibilities and tasks as a Unit Leader:
• Lead and support of the lab team and coordinate of workflow.
• Achieve the required production program, re-plan of it if necessary.
• Recording production datas, running KPIs, making monthly reports.
• Performing technology development and optimization tasks.

TECHNICIAN   (2017-02 – 2018-01)

As a technician my responsibility was to:
• carrying out tasks related to general viral vaccine production (in aseptic working environment).
• proper handling of technical equipment in a high-responsibility work environment, production documentation, reporting.

EDUCATION

❖ Green Fox Academy

Junior Software Developer   (2019)
Computer Software Engineering

❖ John von Neumann University

Quality Systems Engineer   (2017 - 2019)
Bachelor of Engineering - BE

❖ University of Szeged

Biochemical Engineer   (2014 - 2017)
Bachelor of Engineering - BE

ABOUT ME

I gained leadership practice in manufacturing environment, therefore I can work very well and efficiently on complex problems within a team.

I've always been a progressive-minded man, attracted by technological advancement.
Thats why I want to experience what is it like to work as a programmer.
